## Modular & Portable Buildings

**PrimeTec Epox-602** is a one-component water based epoxy primer with excellent adhesion and anti-corrosive performance. This is an ideal primer for the manufacturers of new metal portable buildings. PrimeTec Epox-602 is very fast drying and can be over-coated with both one and two-component topcoats.

**ArmourTec AC-910** is a water based coating designed for the manufacturers of new portable buildings as a high performance topcoat over PrimeTec Epox-602 water based primer.

ArmourTec AC-910 is also used extensively by refurbishers of modular & portable buildings as a one-coat high performance coating which provides an extremely tough, hardwearing and chip resistant finish.

**ArmourTec AC-914** is a high performance water based direct to metal coating, which acts as both a primer and finish in one single application. ArmourTec AC-914 is a fast drying coating with excellent adhesion and combines both outstanding anti-corrosive performance along with excellent outdoor durability.

ArmourTec AC-914 provides a tough, hardwearing surface, with superior chip and scratch resistance. This is ideal for manufacturers of new metal portable buildings where a one coat application is required.

**ArmourTec AC-917** is a durable water based interior paint for the refurbishment of modular and portable buildings. ArmourTec AC-917 offers excellent adhesion to melamine and polyester laminated wall panels and provides an extremely hard wearing decorative coating.

**ArmourTec AC-303** is a high opacity durable emulsion paint that provides an extremely tough and hardwearing finish.

ArmourTec AC-303 is a fast drying coating for use on interior plasterboard walls and is offered in either a silk or matt finish.
