

# Factory Finish Joinery Systems

High quality coatings for interior and exterior joinery applications...

## EXTERIOR OPAQUE JOINERY

**PrimeTec AC-300** single pack water based micro-porous exterior joinery primer offers easy application by spray to a smooth matt finish. PrimeTec AC-300 is very quick drying and has good stackability and sandability properties. PrimeTec AC-300 offers superior adhesion to softwood substrates and ensures a good foundation for over coating with our ShieldTec AC-702 water based topcoat.

**PrimeTec AC-350** is a single pack water based micro-porous anti-stain exterior joinery primer specifically formulated to deliver excellent restriction of tannin staining and reduces surface discolouration. PrimeTec AC-350 delivers a matt, easy sand finish that is very quick drying with excellent adhesion to hardwoods and other timber species. PrimeTec AC-350 provides a very smooth surface and an excellent key for over coating with our ShieldTec AC-702 water based topcoat.

**ShieldTec AC-702** single pack water based exterior joinery topcoat provides superior outdoor weathering durability and excellent protection even in severe environments when used with one of our exterior joinery primers. ShieldTec AC-702 is easy to apply by spray and delivers a durable and attractive smooth satin or gloss finish. Due to its high solids and excellent opacity even at low film thickness, ShieldTec AC-702 achieves excellent coverage rates.

## EXTERIOR TRANSLUCENT SYSTEM

**BaseTec AC-700** is a one pack water based exterior joinery matt base stain that both enhances the appearance of wood and provides excellent protection. BaseTec AC-700 delivers excellent adhesion to most timber species. When combined with our ShieldTec AC-700 translucent water based topcoat, the system provides excellent durability and protection. Application of BaseTec AC-700 is easily achieved using spray or dip process.

**ShieldTec AC-700** is a high-performance water based single pack translucent topcoat designed to overcoat our BaseTec AC-700 to enhance the appearance of wood whilst providing a tough and durable finish and excellent weather resistance. ShieldTec AC-700 wood coating is available as either a satin or high lustre finish. This full system is available in our Woodland Collection in a range of attractive shades.

## INTERIOR JOINERY

**PrimeTec AC-305** is a single pack water based micro-porous interior joinery primer, which is easily spray applied to provide a high build, quick drying, easy sand matt finish. PrimeTec AC-305 has been formulated to offer superior adhesion to various substrates including MDF, HDF and fibre board. PrimeTec AC-305 ensures a strong smooth foundation for over coating with our ShieldTec AC-705 water based interior joinery topcoat.

**ShieldTec AC-705** is a one pack water based interior joinery topcoat which provides an attractive smooth satin or gloss finish, very quick drying speeds and good resistance to blocking when stacked. ShieldTec AC-705 is very durable and hardwearing, making it the ideal coating for demanding internal applications. Application of ShieldTec AC-705 is easily achieved by spray, has excellent coverage rates and is available as either a clear finish or a tinted opaque shade.

**ShieldTec PU-206** 2 pack water based interior joinery topcoat provides a smooth, scratch resistant finish, quick drying speeds and good resistance to blocking when stacked. ShieldTec PU-206 is recommended for use on most types of internal substrates including softwood, hardwood, MDF and HDF board. ShieldTec PU-206 is available as either a clear or tinted opaque in an eggshell or gloss finish and provides superior chip and scratch resistance. ShieldTec PU-206 is easily applied by conventional, airless or air assisted airless spray and achieves competitive coverage rates.

**At AquaTec Coatings, we offer high quality water based coatings at competitive prices. Our dedicated technical support and sales team is always on hand to provide excellent customer service.**
