

Graffiti Removal & Protection

High performance systems for removal and anti-graffiti protection...

GRAFFITI REMOVAL

GraffiTec E-100 is a strong graffiti removing gel, which has been designed for use on variety of porous and non-porous substrates including masonry, metal, glass and tile polished marble. GraffiTec E-100 has been designed to offer the user an easy and effective way to remove all graffiti, including permanent marker, ball pens and spray paints.

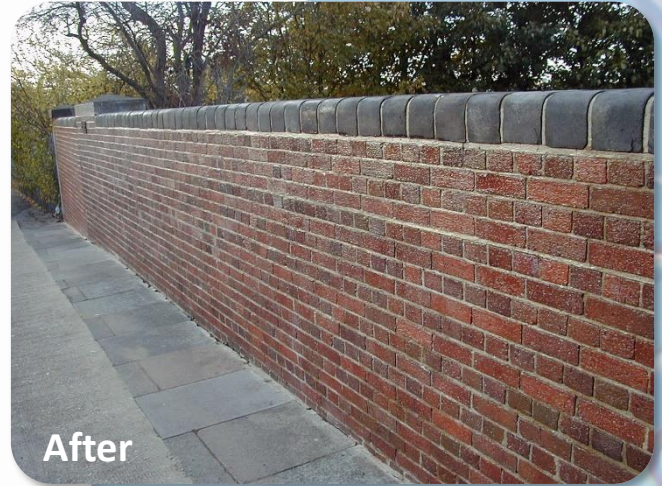

GraffiTec Remover 1000 is a mild graffiti remover for removing graffiti from hard non-porous surfaces such as metal, glass, tiles and plastic. This special formulation ensures the removal of permanent marker, ball pens and spray paints.

GraffiTec Remover 2000 is a strong graffiti removing gel for removing graffiti from porous surfaces such as masonry brick stone and other porous substrates. This has been designed to offer the user an easy and effective way to remove graffiti.

Before

After

GraffiTec Ghost Remover 3000 is a strong graffiti remover for removing graffiti which has penetrated deeply into the wall and is sometimes referred to as 'ghosting' or 'shadowing'. This remover breaks down the ghosting and brings it to the surface where it can be effectively eliminated.

GraffiTec Ghost Remover 4000 is an acidic rinse used to 'fizz' out any remaining pigment ghosting or shadowing and neutralises the pH of the wall after using GraffiTec Ghost Remover 3000. This remover penetrates any remaining shadowing and brings it to the surface where it can be effectively eliminated.

Graffiti Removal & Protection

ANTI-GRAFFITI PROTECTION

GraffiTec PU-200 anti-graffiti coating is an environmentally friendly two component water based anti-graffiti coating. It is a very cost effective coating with very good coverage rates and is available in any colour and gloss level. GraffiTec PU-200 can be used on interior or exterior applications and can be used to coat existing paint, untreated concrete, masonry and brick.

GraffiTec HS-300 anti-graffiti coating is the ultimate solvent free two-component permanent anti-graffiti coating. GraffiTec HS-300 provides superior protection against graffiti, its unique formulation causes any graffiti to have a beading effect on its surface which spoils the graffiti artist's results and acts as a deterrent against further graffiti attacks. GraffiTec HS-300 is suitable for a range of substrates and is easy to apply.

GraffiTec Invis-100 anti-graffiti coating is an invisible water based permanent anti-graffiti system for use on porous mineral surfaces. GraffiTec Invis-100's unique nanotechnology treatment protects a structure's surface from dirt, grime, graffiti spray paint or permanent marker pen.

At AquaTec Coatings, we offer high quality water based coatings at competitive prices. Our dedicated technical support and sales team is always on hand to provide excellent customer service.
