

# Structural Steelwork

High quality primers, topcoats and direct to metal coatings...

Introducing our range of water based, non-toxic primers, topcoats and direct to metal system specifically formulated for the structural steel industry. All our products offer fast application by airless spray and are available in any colour including RAL and BS shades. Our range of coatings have been tested to ISO 12944 standard and meet the requirements for C1-C5 corrosive categories. Contact AquaTec directly for a corrosive system recommendation based on your requirements.

## PRIMERS

**PrimeTec Ultra 6007** single pack holding primer delivers good adhesion to a variety of metal substrates, quick drying speeds, and a competitive price. PrimeTec Ultra 6007 provides excellent early water resistance and protects the substrate through construction, transport and storage. PrimeTec Ultra 6007 is easy to apply by spray application, is suitable for shot blasted substrates and provides a good base for over coating if required.

**PrimeTec Epox-300** is a water-borne, high build, polyamide cured, zinc phosphate, two pack epoxy primer which offers very fast drying, excellent adhesion and superior long term anti-corrosive properties.

PrimeTec Epox-300 can easily be applied by airless spray and is suitable for use as a primer finish or can be over-coated with a range of solvent based or water-based topcoats. PrimeTec Epox-300 delivers excellent chemical and solvent resistance and is resistant up to 100°C.

## TOPCOATS

**ShieldTec Ultra 6012** gloss single pack water based paint provides very fast drying to a tack free, durable, chip resistant smooth finish. With excellent adhesion properties, ShieldTec Ultra 6012 is suitable for use on primed, previously painted surfaces and to bare steel. ShieldTec Ultra 6012 delivers excellent opacity as well as dirt, UV and early water resistance. ShieldTec Ultra 6012 offers excellent anti-corrosive performance and flash rust resistance when applied to bare steel. Extended corrosive performance can be achieved when used with one of our compatible primers.

**ShieldTec PU-200** gloss two pack water-borne polyurethane topcoat provides an extremely durable and scratch resistant finish. ShieldTec PU-200 is suitable for use on primed, previously painted surfaces and to bare steel. ShieldTec PU-200 offers excellent UV resistance along with superior solvent & chemical resistance properties. ShieldTec PU-200 can easily be applied by airless or air assisted airless spray application.

## DIRECT TO METAL COATINGS

**ShieldTec Ultra 6010** is a high performance water based direct to metal coating, which is quick drying, has excellent adhesion and a hardwearing, chip and scratch resistant gloss or eggshell finish. ShieldTec Ultra 6010 provides outstanding corrosion resistance and long term outdoor weathering properties. ShieldTec Ultra 6010 can also be used with our range of water based primers for extended corrosion performance. ShieldTec Ultra 6010 is easy to apply and due to its high solids delivers excellent opacity and competitive coverage.

At AquaTec Coatings, we offer high quality water based coatings at competitive prices. Our dedicated technical support and sales team is always on hand to provide excellent customer service.
